the same camera).

## remove your camera from the device when not using the stabilizer. If you want to resume use simply remount your camera and turn the device on (you do not need to rebalance for

Balance and calibration only has to be done

once for your camera. Once initial setup has

been performed on your Kylin you can simply

FCC INFORMATION

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If

on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

this equipment does cause harmful interference to radio or television

reception, which can be determined by turning the equipment off and

- Increase the separation between the equipment and receiver.
   Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   Consult the dealer or an experienced radio/TV technician for help.
- Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

  This device complies with part 15 of the FCC Rules. Operation is subject

(1) This device may not cause harmful interference, and (2) this device

must accept any interference received, including interference that may

to the following two conditions:

cause undesired operation.
